PROFILE

Dedicated **Full Stack Developer** with 2+ years of combined experience across full-time engineering and backend internships. Adept in architecting scalable React frontends, robust Node/Express RESTful APIs, and optimized database solutions. Committed to clean code architecture, JWT security, test-driven validation, and responsive mobile-first UI design.

TECHNICAL SKILLS

Core Stack
MongoDB, Express.js, React.js, Node.js

Frontend & State
React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & APIs
Node.js, Express.js, REST APIs, JWT, Python, FastAPI, Django, Socket.IO

Databases & Optimization
MongoDB, MySQL, PostgreSQL, Query Optimization, Indexing, Caching

Tools & Architecture
Git, GitHub, Postman, Insomnia, VS Code, Jest, AWS S3, Stripe API

EDUCATION

Master of Computer Applications - AI & ML
LNCT University, Bhopal, MP
Oct 2023 - May 2025 · **First Class Distinction**
Focus: Web Architecture, Distributed Systems & AI

Bachelor of Computer Applications
DAVV University, Indore, MP
Aug 2019 - Jul 2022 · **First Division**
Focus: Data Structures, Database Systems & OOP

CERTIFICATIONS

Python Certification
Infosys Springboard · Verified Credential
Core Python, Data Structures & Object-Oriented Design

Python with Data Structures & Algorithms
Tech Sim Plus · Advanced Algorithms
Algorithmic Problem Solving, Trees, Graphs & Recursion

STRENGTHS

- Problem Solving & Root-Cause Debugging
- RESTful API Architecture & JWT Security
- Agile Collaboration & Git/GitHub Workflows
- Database Query Optimization & Performance

LANGUAGES

- English** — Professional Working Proficiency
- Hindi** — Native / Bilingual Proficiency

PROFESSIONAL EXPERIENCE

- Full Stack Developer

Jun 2025 - Present

Indore, MP

Evyv Solution · Full-time

 - Architect and maintain full-stack web applications utilizing **MongoDB, Express.js, React.js, and Node.js**.
 - Engineer secure **RESTful APIs with JWT authentication**, input validation, and role-based access control.
 - Develop dynamic, mobile-first responsive interfaces using **React.js and Tailwind CSS** across devices.
 - Collaborate with engineering teams through structured **Git/GitHub** code reviews and sprint workflows.
 - Troubleshoot full-stack bottlenecks, test edge cases, and validate endpoints using **Postman and Insomnia**.
- Backend Developer Intern

Jun 2024 - Jun 2025

Bhopal, MP

Wyreflow Technology · Full-time

 - Reduced API response latency by 40%** through MongoDB query optimization, compound indexing, and caching.
 - Strengthened server security by implementing **JWT authentication**, password hashing, and input sanitation.
 - Constructed and maintained dependable RESTful endpoints to streamline server-side data processing and storage.
 - Collaborated with frontend developers to integrate APIs seamlessly and debug asynchronous request workflows.

SELECTED PROJECTS

- Zayro - Travel & Flight Booking Platform

LIVE APP ↗ ADMIN PANEL ↗

TECH STACK: React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Prisma, PostgreSQL, REST APIs, Benzy Flight API, Stripe, AWS S3, Jest.

Comprehensive full-stack booking system featuring dynamic flight search, live booking engine, and administrative controls.

 - Engineered one-way, round-trip, and connecting flight flows with live pricing, advanced filters, and interactive seat maps.
 - Integrated **Benzy Flight API** for real-time schedule syncing, instant fare updates, seat availability, and booking confirmations.
 - Implemented **JWT/OTP authentication**, role-based access, Stripe checkout, S3 invoice generation, and Jest tests.
- Vinstar - ID Verification

LIVE APP ↗

TECH STACK: React.js, JavaScript, Tailwind CSS, Node.js, Express.js, REST APIs

 - Developed a secure ID verification platform for streamlined onboarding and identity validation.
 - Enabled document uploads and verification requests through an easy-to-use interface.
 - Added real-time status tracking for pending, approved, and rejected verification requests.
 - Secured sensitive user data while maintaining smooth, reliable verification workflows.
- Chatbot - AI Conversational Platform

LIVE APP ↗

TECH STACK: React.js, JavaScript, Node.js, Express.js, REST APIs, AI Integration

 - Developed an intelligent chatbot for instant responses to user questions and support requests.
 - Designed context-aware conversational flows for natural, helpful interactions.
 - Reduced support response time by handling common user queries efficiently.
 - Created a clean, user-friendly chat interface for a smooth, engaging experience.
- ChatterBox - Real-Time Chat Platform

CODE ↗

MERN · Socket.IO · JWT Authentication · Tailwind CSS

Engineered a responsive real-time messaging application with persistent bidirectional communication and user session management.

 - Integrated **Socket.IO** event pipelines for instant messaging, live typing status, and real-time user presence.
 - Connected reusable React components with Node.js/Express APIs for maintainable workflows and MongoDB storage.
